

# GRAND JUNCTION ROCKIES

Joe Kubly - President

A LEARFIELD COMPANY

## PRODUCT INFORMATION:

Screen Size: 16'H x 27.7'W

Product: DigiLED 16mm

Location: Grand Junction Rockies Stadium, Right-Centerfield

## THE GOVISION SOLUTION:

The Grand Junction Rockies, partnering with the Junior College World Series, sought to purchase a new video display for their jointly utilized stadium. The GoVision solution was a 16mm, 7,000 nit, state-of-the-art LED display; providing major league quality, color reproduction, and game day content that professional and college baseball fans have come to expect. Working with a local sign contractor, GoVision designed and engineered the new structure and also provided the clients with professional-level game day content and content control equipment. Once installed, the new video display and production equipment was helped to provide enhanced fan experiences through live video, instant replay, and statistics along with community messages and additional sponsorship opportunities.

## CLIENT QUOTE:

*"GoVision has been great to work with from start to finish, they were very informative and were a great resource of knowledge. The staff has been great to work with from top to bottom, and they were there for us along the way. Our GoVision board is a great new asset to our ballpark and we are already seeing it pay dividends, just a few months in. GoVision is leading the way in video board technology that is very user friendly and the software is easy to learn as well as use."*
