Mike Tabor - General Manager

A LEARFIELD COMPANY

PRODUCT INFORMATION:

Screen Size: (2) 19'H x 32'W

Product: GoVision LT10mm (Outdoor)

Locaton: Stage left and Stage right

THE GOVISION SOLUTION:

Live Nation and Starplex Pavilion, knew it was time to upgrade the older projection technology at their venue to a brighter, easier to service and maintain product that could produce a better image, thus a better experience for their patrons. Understanding the client's needs, GoVision leaned on the their modular experience to design and implement a pair of state-of-the-art moveable LED screens that accomplished all of their needs.

Moving from projection to daylight visible LED screens provided the pavilion the ability to present their patrons with a pair of displays, almost TEN TIMES BRIGHTER than the projection screens, that could be viewed in direct sunlight; a task not easily accomplished with their former projection screens. Moreover, the modular design of the new LED screens provided the venue the ability to easily service and maintain the screens with much less effort and expense.

DEDICATED TO UNRIVALED EXPERIENCES
